SIST COIN WHITEPAPER

1. Introduction

SIST COIN is a next-generation cryptocurrency built on the TON blockchain. It is designed to facilitate fast, low-cost transactions while offering users multiple ways to earn and utilize the token. Initially launched as a Jetton token on the TON ecosystem, SIST COIN aims to transition to its own blockchain for enhanced decentralization and scalability.

2. Technical Information

- Blockchain: TON (The Open Network)

- Token Standard: Jetton (TON-based token standard)

- Smart Contract Address: EQBUGt_WR6pAvwIPmzkBQ38sJjyPLIAob5Nk_0Lp59rBdtVp

- Total Supply: 100,000,000 SIST

- Decimals: 9

- Consensus Mechanism: Proof of Stake (planned future transition)

3. Tokenomics

SIST COIN has a structured token distribution model to ensure a balanced ecosystem:

- 50% - Mining Rewards (Game and Faucet Rewards)

- 20% - Liquidity & Exchange Listings

- 15% - Staking and Yield Farming

- 10% - Ecosystem Development (DApps, DeFi, NFT projects)

- 5% - Community and Marketing (Airdrops, Partnerships)

4. Use Cases

SIST COIN is designed to be an integral part of the SISTEMAPLUS ecosystem, with applications including:

- Gaming & Rewards: SIST COIN is the main currency in multiple blockchain games.

- Staking & Passive Income: Users can stake SIST COIN to earn rewards.

- NFT Marketplace: SIST COIN will be used for NFT purchases and transactions.

- Decentralized Finance (DeFi): Liquidity pools, farming, and lending services.

- Cross-border Transactions: Low-cost remittances and instant transfers.

5. Roadmap (Development Plan)

Phase 1 - 2025:

- Token creation on TON blockchain

- Initial airdrop and community building

- Listing on STON.fi DEX

- Smart contract verification and audits

- Integration into SISTEMAPLUS gaming platform

- Staking & Yield Farming deployment

- Listing on CoinMarketCap & CoinGecko

- Liquidity pool expansion

Phase 2 - 2025:

- NFT marketplace integration

- Further liquidity and exchange expansion

- Community engagement and marketing campaigns

Phase 3 - 2026:

- CEX listing on MEXC, Gate.io

- Migration to SIST native blockchain

- Community DAO governance launch

6. Team and Community

SIST COIN is developed and maintained by the SISTEMAPLUS team. The project is fully decentralized and community-driven. Join our community:

7. Exchange Listings

SIST COIN is currently available on:

- STON.fi (TON DEX) - Available Now

- DEXTools: Trade on DEXTools - https://www.dextools.io/app/ru/ton/pair-explorer/EQCXjoz-BUJCZ5H_FMx6HtxcbhXS4QaOVw02Ld 0Nk8OlUedu?t=1739383609311

- GeckoTerminal: Trade on GeckoTerminal - https://www.geckoterminal.com/sv/ton/pools/EQCXjoz-BUJCZ5H_FMx6HtxcbhXS4QaOVw02Ld0Nk 8OlUedu

- PancakeSwap (BSC DEX) - Planned

- MEXC, Gate.io (CEX Listings) - Planned

8. Conclusion

SIST COIN aims to become a leading blockchain-based digital asset, providing real-world utility in gaming, DeFi, and decentralized applications. With strong community support and a clear development roadmap, SIST COIN is positioned for long-term growth in the blockchain ecosystem.
